

# **ELECTROPSYCHOMETRIC AUDITING**

## **OPERATOR'S MANUAL**

**June 1952**

**by  
L. Ron Hubbard**

### **FOREWORD**

Although the principal emphasis of this text on the use of the ELECTROPSYCHOMETER, an instrument especially developed for use in *Dianetics: The Modern Science of Mental Health*, the data contained herein is equally applicable to any "lie detector" as used by police and in psychology laboratories.

The measurement of thought with a meter is not new; the understanding and accuracy of measurement is new.

Einstein is reported to have said that all an observer should be permitted to do is to read a meter and report the message of the meter. This is true enough. But the observer of a human mind can read it with a meter only if the meter is an accurate and constant meter, and only if he knows what questions to ask. The constancy of the meter and the questions to ask are the subjects of this operator's manual. E-Metering is a science and an art.

The nimble needle of the electropsychometer can detect with accuracy things which would have been otherwise hidden from man forever.

The invention of the electropsychometer, like so many important things in this cynical and dull age on Earth, is not cited by our generation as very important. Yet in a future time historians may well spend pages and pictures upon it.

For if the truth be known, the electropsychometer utterly dwarfs the invention of the microscope, for Leeuwenhoek found the way only to find bacteria; the electropsychometer provides the way for man to find his freedom and to rise, perhaps, to social and constructive levels of which man has never dreamed, and to avoid perils in that route which man, in going, would have found more deadly than any bacteria ever evolved or invented.

There may be those who underestimate this achievement; but they also underestimate themselves.

This E-Meter will find lost articles for anybody simply by dividing up the area of the loss and going over each area with a question and then narrowing it down until you get a drop. It will spell words of towns, names, by dividing up the alphabet and asking. It sees all, knows all. It is never wrong.

And now you're on your own.

*Good Hunting!*
