OT LEVELS

Psychotics deal with doing people in. Their whole mission in life is destruction.

You can, with the utmost certainty, identify a criminal psychotic by the way he vilifies or degrades or seeks to stop Clears and OTs from coming into existence.

It is lost on him that immorality and crime in others stem from the very things he is doing to them.

So look well at psychs and antireligious campaigners. They are speaking from their own blackened souls and they speak from terror.

That people when they grow saner are less inclined to vengeance is an argument they cannot assimilate. They know if *they* had the power to torture and kill everyone they would do so.

Thus, the psychs with their rantings and electric shocks wear their own brand clearly marked on them by their own conduct in life.

Recognize them for what they are—psychotic criminals—and handle them accordingly.

Don't let them stop man from going free.
